

Dark Acacia

All products within the range are made from durable Acacia hardwood, with a silky smooth rich brown finish. It is a true example of quality craftsmanship, combined with quality materials - a definite win, win.

Maintenance

After time there will be hairline cracks and surface wear appear in the finish due to the timber moving. This won't affect it's durability.

We recommend applying our Timber Treatment annually which replenishes natural oils whilst providing protection against water ingress and food/drink stains. It also enhances and protects the natural look of the timber.

You can follow with a thin layer of Timber Sealer to lock in the Timber Treatment and prolong it effectiveness.

We have a range of furniture covers available to fit your furniture.
