

Teak

The King of Timbers, Teak makes for the perfect choice for outdoor furniture. High in natural oils and rubber mean that it's naturally weather resistant. As a dense hardwood you will not be surprised by the weight of our products and we do recommend having multiple people on hand when you are setting up any of our teak pieces. Our Teak is produced using FSC® 100% certified timber.

Maintenance

If left untreated Teak will mellow to a beautiful silver/grey appearance.

If you want to maintain the original colour we recommend applying Timber Protector annually which will enhance the appearance.

Alternatively you can apply our colourless Timber Shield every 6 months.

When you receive your Teak plank table, it is essential that 4 people assemble and manoeuvre it, as the table is very heavy.

Check and tighten all hardware regularly, failing to do so can damage parts of the furniture.
